

Exercise 1: Travel Consulting Company - Entity Relationship Diagram

ASSUMPTIONS

1. A team handles one region at a time; re-assigning a team just changes team.regionId.
2. A consultant is normally on one team but consultant_team allows covering other teams too.
3. Monthly call statistics are generated from call_log rather than stored separately.

Exercise 2: DVD Rental Company - Entity Relationship Diagram

ASSUMPTIONS

1. A branch has one manager (a staff member) at a time; a staff member works at one branch at a time.
2. dailyRentalCost is recorded directly on each rental as the standard rate charged at that branch.
3. registration links members to branches (with a join date) since a member can register at several branches at once.
